ITEM 3A: Mayor Nelson presented an ordinance considering the rezoning of a 4.77 acre tract of unplatted tract of land in Section 231, Block 2, AB&M Survey, Randall County, Texas, plus one-half of all bounding streets, alleys, and public ways to change from Residential District 1 to Moderate Density District. (Vicinity: Western Street and Knoll Drive.) This item was presented by Cris Valverde, Assistant Director of Planning and Development Services. Councilmember Powell inquired how the building of townhomes would affect the values of homes in the neighborhood. Mr. Valverde stated he was not able to answer that question. Councilmember Hays inquired how the rezoning might affect the surrounding landowners. Councilmember Powell inquired if apartments could be built in the area. Mayor Nelson opened a public hearing. Maria Mungia, 7629 South Western Street, she stated she opposed the rezoning because it would be in her backyard. She stated she preferred to keep the acreage. Councilmember Hays stated the owner has the right to build individual homes and it was not public land, something will be built in the acreage. Ms. Mungia further stated that places with townhomes and apartments tend to bring trash and crime. Barry Christy, 5901 Aberdeen Parkway, stated he was the builder and requested the rezoning be approved. He stated his plans were consistent with the other neighborhoods except they were single-story townhouses. Councilmember Hays inquired about the population in the area. She further inquired if there were other neighborhoods in the community that did not have this type of zoning. Mr. Valverde replied he was surprised that City View did not already have this type of zoning. There were no further comments and the public hearing was closed. Motion was made that the following captioned ordinance be passed on first reading by Councilmember Powell, seconded by Councilmember Smith:

ORDINANCE NO. 7787

Second and final reading to consider rezoning of a 4.77 acre tract of unplatted tract of land in Section 231, Block 2, AB&M Survey, Randall County, Texas, plus one-half of all bounding streets, alleys, and public ways to change from Residential District 1 to Moderate Density District.

Vicinity: Western St. and Knoll Dr.

Applicant: Barry Christy

Agenda Item Summary

Adjacent land use and zoning

Adjacent land uses consist of a church to the north, single-family detached homes and vacant land to the west, single-family detached homes to the south, and a single-family detached home and a distribution business to the east.

Adjacent zoning consists of Residential District 1 (R-1) to the north, east, and west and Residential District 2 (R-2) to the south.

Proposal

The applicant is requesting rezoning from R-1 to Moderate Density (MD) in order to develop townhomes on this site. As it stands now, townhomes are not allowed in Residential Districts 1 through 3; hence the request for rezoning.

Analysis

Whenever a request for rezoning occurs, understanding what impacts a proposed rezoning, if any, will have on existing area development and/or zoning patterns is considered.

With the applicant's tract located at the western periphery of the City View Estates Subdivision, analysis of the entire subdivision (roughly a square mile section of land) in order to obtain a more complete view of the area development and zoning patterns is done.

The Future Land Use Map recommends what types of land uses a particular area should develop with. General Residential (dark yellow) and Suburban Residential (light yellow) are the predominate types of development recommended and are illustrated below.

Recommended development types within General Residential are primarily focused on detached residential dwellings with allowances for attached dwelling units such as duplexes and townhomes. Suburban Residential also focuses on detached residential dwellings yet also include allowances for attached dwelling units. The main differences between the two is that General Residential has less openness and separation between dwellings when compared to Suburban Residential.

With regards to existing zoning patterns and as illustrated by the graphic below, the majority of the section is zoned Residential District 2 (brown) with a small portion of zoned Residential District 1 (yellow). These two predominate zoning districts allow for single-family detached residential development only.

In regards to existing development patterns and as expected by the predominate zoning of the area, single-family detached homes are the predominate land use within the area.

Looking at the location of the applicant's tract and the rezoning request, townhome development is being proposed in an area recommended for Suburban Residential characteristics. Although townhomes are recommended within Suburban Residential, open space is not typically found with this type of development whereas lots standards (setbacks, lot coverage, and lot size) create a more dense development.

That said and with exception of the immediately adjacent land, when comparing the existing land use and zoning patterns of the area as a whole with the Future Land Use Map, all of the areas identified as Suburban Residential (light yellow in the Future Land Use Map) are currently developed with residential development or zoned for residential development that share characteristics found in General Residential.

Considering this and if approved, townhome development would share similar development characteristics to the majority of the City View Estates development patterns found in the area. As such, the Planning and Zoning Commission does not foresee any detrimental impacts on existing zoning or development patterns in the area.

Additionally, attached dwelling development and/or zoning are not found within the City View Estates Subdivision as a whole. This is unique in that developers typically provide various residential products (detached, attached, and apartments) within a subdivision. These additional residential products are recommended and typically found at the periphery of a subdivision in many other subdivisions in Amarillo. In the Planning Commission's opinion, incorporating the proposed zoning and land uses allowed, could strengthen the City View Estates neighborhood by adding a varied choice of residential products.

Requested Action/Recommendation

Notices have been sent to property owners within 200 feet regarding this proposed rezoning. At the time of the Planning and Zoning Commission meeting, the developer spoke on behalf of the request.

Also during the meeting, three area property owners (highlighted in red in the graphic below), expressed either opposition or concern with the request. One property owner stated that if this tract is developed, the existing view from his front yard would be removed, another stated that property values could be diminished if approved, and the third stated increased traffic and the possibility of apartments being developed could change the characteristics of the area.

An update will be provided at the Council meeting should there be additional comments received.

Considering all the above and the comments made during the meeting, the Planning and Zoning Commission was of the opinion that the applicant's request is appropriate. Therefore, the Planning Commission unanimously recommended approval as presented.

Memo

To: Jared Miller, City Manager
Michelle Bonner, Deputy City Manager

From: Wesley Hall, Risk Management Director

Re: Fire and Extended Coverage

Date: May 29, 2019

In March 2019 the City marketed an RFP for fire and extended coverage. Fire and extended coverage indemnifies the City when real and personal property (buildings and contents) are damaged or destroyed by covered perils such as wind, hail, fire, flood, and earthquake. This policy includes business interruption coverage when the interruption is caused by a covered peril.

Only one respondent presented a proposal in response to the RFP; NCW Insurance. Their submittal includes a premium of \$920,380, with a policy limit of \$500,000,000. This represents a 93% premium increase from the previous year and a \$100,000,000 decrease in the policy limit. This cost increase is representative of the current market conditions and the City's recent claims history. Staff anticipated a premium increase and budgeted appropriately. The policy will be underwritten by the City's current carrier Affiliated FM Global. The policy contains various deductibles, with the majority of perils having a \$250,000 deductible. The major exception is wind and hail coverage. The City will retain a 5% deductible per building, per occurrence for wind and hail claims.

With support of the Risk Management Board, and the City's insurance consultant, staff is recommending the award of the fire and extended coverage insurance policy presented by NCW Insurance. This will replace the current policy set to expire on July 1, 2019. The term of the new policy is July 1, 2019, through July 1, 2020.

CONSIDERATION OF ORDINANCE No.

(Contact: Izzy Rivera, Chief Building Official)

This is the second and final reading of an ordinance amending the Amarillo Municipal Code, Chapter 4-1, Article I, Division 2, Sections 4-1-20 and 4-1-21 to revise calculation of residential building and inspection permit fees.

Agenda Item Summary

House Bill No. 852 was signed by the Governor on May 21, and it is effective immediately. Specifically, this bill provides that: (1) in determining the amount of a building permit or inspection fee required in connection with the construction or improvement of a residential dwelling, a city may not consider: (a) the value of the dwelling; or (b) the cost of construction or improving the dwelling; and (2) a city may not require the disclosure of information related to the value of or cost of construction or improving a residential dwelling as a condition of obtaining a building permit except as required by the Federal Emergency Management Agency of participation in the National Flood Insurance Program.

The City of Amarillo has a residential plan review/building permit fee that is based on the value of the project. This Ordinance will change the fee calculation to be based on the square footage for a residential dwelling. The City's review of the cost associated with the plan review and building permit process has determined a \$0.45 per square foot of all floor areas under roof.
