The USER is responsible for conducting appropriate and applicable in-building and geographical coverage testing to determine the expected radio coverage level for USER's equipment.

11. USER shall use due diligence in the maintenance and configuration of their subscriber radio equipment to ensure that no USER radio causes a degradation to system operation. The COA shall have the right to remove from operation any field radio unit or equipment owned by USER that is operating on, attached and/or interfaced to the COA infrastructure, if such equipment is found to cause interference or harm to the system in any way. The COA will make the USER aware of any subscriber radio equipment that is subject to being removed from the system prior to being removed except for severe circumstances. The COA reserves the right to request that USER operated field radio units or equipment operating on, attached and/or interfaced to the infrastructure be tested for proper operation and/or repaired by an authorized radio repair facility. The cost of such testing or repair will be the sole responsibility of USER. Furthermore, the COA shall have the right to deactivate, without prior notification to or consent of USER, any field radio suspected of causing interference, intentionally or unintentionally, to any other radios on the radio system or to the radio systems overall operation.

12. USER's radios may be used for voice radio communications over the radio system infrastructure in accordance with the terms and conditions of this Agreement for as long as this Agreement remains in effect.

13. The COA will be responsible for managing infrastructure loading and demand. COA reserves the right, without notice to incumbent users, to enter into a similar agreement with other entities or to deny the addition of new subscriber radio equipment to any user of the radio system. The COA shall have sole discretion in determining whether to allow additional users or radios based on COA's determination of whether such addition to the radio system can be made without adversely impacting the radio system.

14. USER is prohibited from utilizing telephone interconnect on the radio system. This prohibition shall include, but is not limited to, connecting to either the PSTN (Public Switched Telephone Network) or USER's internal phone system(s) through a console patch into the radio system or to any subscriber radio on the radio system.

15. Due to the radio infrastructure resource allocations required by “Private Call,” USER is not permitted to utilize “Private Call” on the radio system.

16. USER’s utilization of data communications on the radio system will be limited to the radio system’s OTAP functions. Performance of data communications over the radio system is not guaranteed. For programming changes involving more than ten subscriber radios, USER agrees to coordinate with COA prior to executing changes to minimize impact on other users and on the radio system.

17. The use of OTAR in association with subscriber radio encryption is prohibited without prior approval of COA. Administration of encryption keys will be performed exclusively by COA, unless otherwise agreed to in writing between the COA and USER. USER may utilize and administer other encryption methods as required.

18. The COA may provide USER with an Advanced System Key (ASK) for use with the USER’s subscriber radios only. The ASK will be updated annually. USER will be responsible for safeguarding the security of the ASK to prevent theft and/or loss. USER agrees to notify COA immediately upon the theft or loss of the ASK.

19. COA will assign the USER talk group IDs unique to USER operation. All talk group names shall include a prefix unique to the USER’s agency. No other agency will be authorized to use USER talk groups without the express written permission of USER, and a copy of such permission must be on file with the COA before such use may occur. The COA reserves the right to require certain talk group ID’s to be programmed in USER radios. Additionally, the COA shall have the right to limit the number of talk group ID’s to be used by USER and to disable talk groups ID’s as it deems appropriate.

20. The COA will maintain a coordinated Interoperable Communications Plan to apply to COA and the users of its Radio System. USER agrees to participate in the Plan and include the Plan’s interoperable talk groups in the programming of its subscriber radios and console systems.

21. Roaming to other systems or the use of USER’s talk groups on other trunked systems that are interconnected to the radio system is prohibited without prior approval by COA. Roaming to other trunked systems will be limited to the radio system’s interoperable talk groups, although this capability may be terminated by COA if its use is determined to result in performance degradation to either the radio system or the interconnected trunked system.

22. USER may utilize a Network Management Console (NMC) to manage its own environment. USER is responsible for acquiring and maintaining, at USER’s sole cost, all components required to connect the NMC to the radio system. The USER’s NMC must be partitioned in manner to limit access to USER’s own environment only and to prevent USER from viewing, accessing, or making any changes to equipment that is not owned or leased by USER. The USER must ensure the NMC is located in a secure area. USB ports on the NMC must be deactivated except during maintenance activity. All security patches related to operating systems and other associated software must be maintained at current manufacturer-tested levels. No other software applications may be utilized by the NMC.

23. USB ports on the USER's console systems must be deactivated except during maintenance activity. All security patches related to operating systems and other associated software must be maintained at current manufacturer-tested levels. If required, all connectivity between the console systems and the radio system is the responsibility of the USER, including software, hardware and carrier services. Associated costs will be incurred by the USER. Unless otherwise approved by COA, connectivity will be achieved through local terrestrial circuit facilities. The use of other connectivity methods, including but not limited to microwave or fiber, must be approved by the COA. USER may incur additional costs from COA for other connectivity methods.

APPLICABLE FEES; TERMINATION; REFUNDS

24. USER shall pay the COA an annual Infrastructure Support Fee in the amount of \$20.00 per month, per subscriber radio or console and \$500.00 per year for each USER assigned talk-group. This fee is payable in advance on an annual basis for all active radio IDs and talk-groups issued to the USER at the time of the annual billing. Invoicing will occur on a pro-rata basis when new radio IDs or talk-groups are issued, and thereafter, at the beginning of each COA fiscal year. There will be no refunds or credits for radios or talk-groups removed from service during the fiscal year.

25. If the USER subscribes to OTAR services, the USER shall pay the COA an annual OTAR Administration Fee in the amount of \$3 per month, per subscriber radio. This fee is payable in advance on an annual basis for all active radio IDs issued to USER at the time of the annual billing. Invoicing will occur on a pro-rata basis when new radio IDs are issued, and thereafter, at the beginning of each COA fiscal year.

26. COA shall have the right to increase any applicable fees under this Agreement each fiscal year to offset any increased costs incurred by COA in the operation or maintenance of the radio system. Any increase in applicable fees will be effective at the beginning of the next COA fiscal year. COA shall provide USER with 60 days' written notice of any intended fee increase, provided, however, that this notice period may be less than 60 days if Motorola Solutions provides COA with less than 60 days' notice of an increase in the System Upgrade Agreement Fee and such reduced notice period shall not impact USER's obligation to pay the increased fee.

27. Either party may terminate this Agreement upon ninety (90) days written notice. Additionally, the COA in its sole discretion shall have the right to deny USER access to the radio infrastructure and/or the right to terminate the Agreement immediately if USER fails to make full payment of invoiced system fees as referenced in paragraphs 24 and 25 within thirty (30) days after USER's receipt of written notice that payment of such fees is delinquent. Additionally, the COA further reserves the right to terminate this Agreement immediately, or deny access to USER, upon USER misuse of the system in a way that compromises the security or functionality of the system for the COA's purposes.

COMPLIANCE WITH LAWS

28. The USER shall comply with all current and future federal, state, and local laws, ordinances, and mandates, including FCC rules and regulations regarding proper use of radio communications equipment. The USER will also comply with the guidelines, or procedures set out in this agreement. Furthermore, the USER is responsible for enforcing such compliance by its employees, volunteers, or any individual operating USER subscriber radio equipment. Furthermore, the USER will be responsible for payment of any fines and penalties levied against the COA (as the licensee) as a result of improper or unlawful use of subscriber radio equipment owned by USER.

29. In order to comply with federal, state, and local laws and/ or mandates, the COA, as the licensee, may need to act on behalf of the USER regarding possible modifications, reconfiguration, or exchange of owned subscriber radio equipment in order to meet these obligations. For as long as this agreement is in force, the USER will allow the COA to facilitate such activities on USER's behalf as necessary.

ENGINEER SHALL BE RESPONSIBLE FOR PERFORMING THE WORK UNDER THIS AGREEMENT IN A SAFE AND PROFESSIONAL MANNER AND SHALL BE LIABLE FOR ENGINEER'S NEGLIGENCE AND THAT OF ENGINEER'S EMPLOYEES, CONTRACTORS, AND AGENTS.

Associated Supply Company, Inc. (Two 25-ton Rollers) - \$21,285.78.

Total Awarded Amount: \$53,969.43

Agenda Item Summary

Two key pieces of equipment utilized in the sealcoat process are the chipseader and pneumatic roller. For the past eight years, the Street Division has leased a chipseader and two 25-ton rollers for the summer sealcoat program. The leased chipseader serves as a backup to the City owned chipseader to prevent the City from losing valuable hours, or even days, of operation due to equipment malfunctions. The two leased rollers, which are significantly larger than the City owned rollers, provide quicker compaction and better adhesion of the rock to the street surface.

Requested Action

Award lease to second low bidder meeting specifications, Bee Equipment Sales, Ltd., for the lease of a chipseader at the price of \$10,309.55 per month plus \$1,755.00 for delivery. Total cost to lease chipseader for three months is \$32,683.65. The low bidder for the chipseader withdrew bid following sale of the rental unit. Award lease to low bidder meeting specifications, Associated Supply Company, Inc., for the lease of two 25-ton pneumatic rollers at the price of \$3,547.63 per month per roller. Total cost to lease two rollers for three months is \$21,285.78.

Funding Summary

Funding in the amount of \$51,000 (\$24,000 for a chipseader and \$27,000 for two rollers) for the lease of a chipseader and two 25-ton rollers is available in account 1420.69220 Rental of Other Equipment in the approved 2017/2018 Street Division budget.
